

SDMX lab

Registration and Login Guide

Overview

The SDMX lab offers a fast, browser-based way to learn SDMX in courses hands-on. No setup needed.

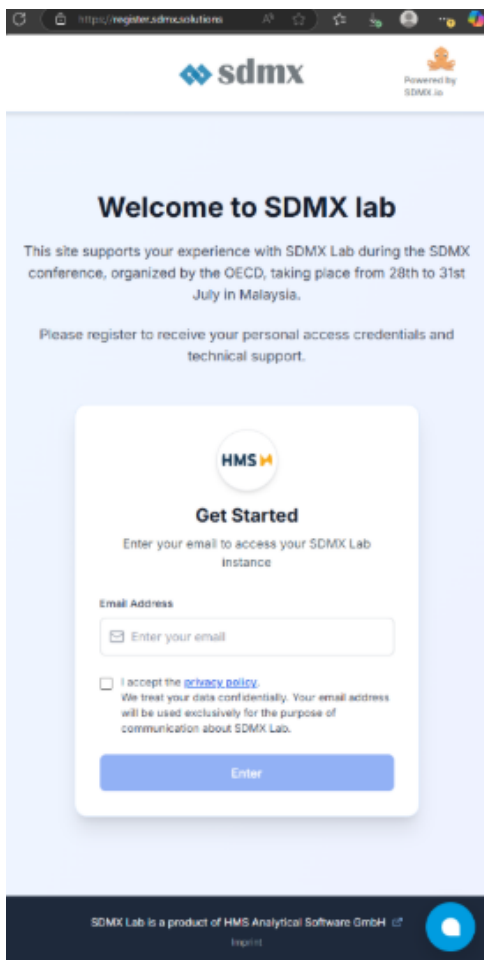

Each participant gets their own lab instance, preloaded with tools like:

- FMR for SDMX metadata management.
- .Stat Suite for working with data dissemination workflows.

This document guides you to your registration and login procedure to the lab.

Step 1) Registration

To register for your SDMX lab follow the steps below.

Registration:

Go to <https://register.sdmx.solutions>.

1. Enter your email address,
2. accept the Privacy Policy, and
3. click 'Enter'.

Note: If you are already registered and enter your email for the second time (or more), you will also receive an email to enter the support page. The information in the next step will always remain the same.

Then, you will receive an email with the confirmation link to access your registration page.

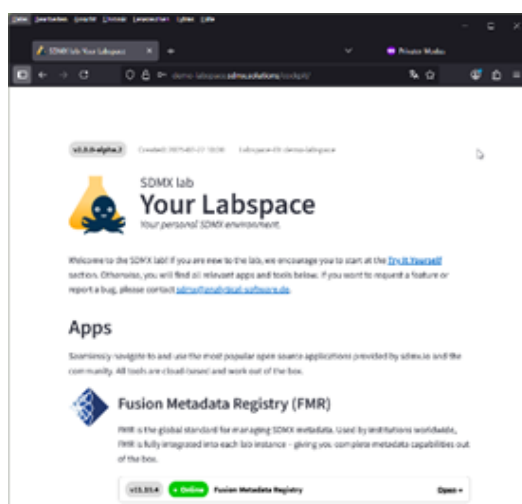

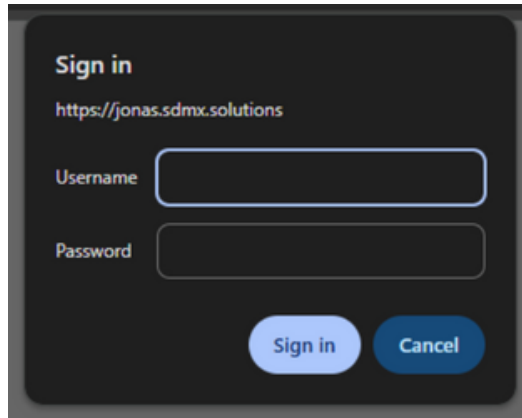

Your Support Page:

Your support page lists:

1. your personal lab URL,
2. your personal username and
3. your personal password.

These credentials cannot be changed.

Step 2) Log in to your SDMX lab

1. Go to your personal lab URL (from the Support Page) or click on Open SDMX lab.
2. Enter your username and password (from the Support Page).
3. The service license agreement appears. Tick both boxes and click Continue.
4. Your Cockpit opens.

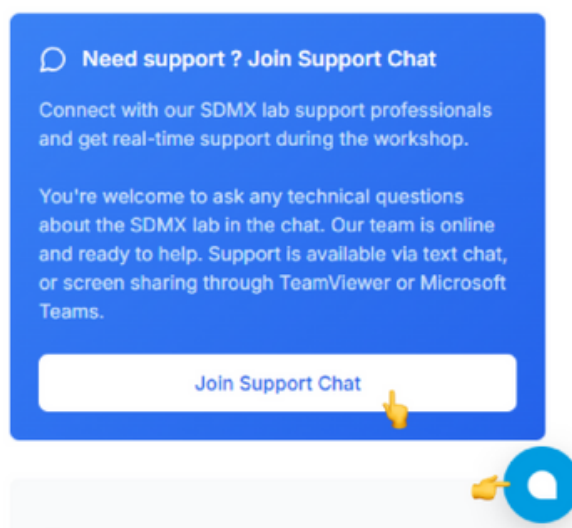

Support Chat

You can ask questions and share feedback via email: sdmx@analytical-software.de

During workshops, the support page offers a real-time chat for technical assistance.

To access the chat, login to the registration page using your email (see step 1) and then click on the button “Join Support Chat” or the blue button on the bottom right.

FAQ

1. I didn't receive the registration email. What can I do?

- Check your spam or junk folder.
- Make sure you entered the correct email address.
- If the problem persists, try registering again with the same email.

2. I lost my username or password.

- Go back to the registration page and enter the same email address.

3. Can I change my username or password?

- No, the credentials are fixed and cannot be changed.

4. I cannot log in with my credentials.

- Double-check that you copied your username and password exactly as shown (watch out for spaces).
- Ensure you are using your personal lab URL from the support page.
- If it still doesn't work, repeat the registration process with the same email.

5. Where can I get support?

- Email: sdmx@analytical-software.de
- During workshops:
- use the real-time support chat (button on the support page).
